Convert contents

There are two methods, Computer Convert and Cell Phone App Convert.

1. Computer Convert

Due to video format are various,some of the video format can not play directly,so there is Encoders in the TF card in our display for each model , after converted by our Encoders, the video can play directly,here is the steps of how to using Encoders :

Copy this files in TF card ,and paste on computer , then decompressing files.

📕 Convert_V1.1.1.zip	2018/7/20 17:08	WinRAR ZIP 压缩...	14,788 KB

⬇

📁 bin	2018/7/10 15:34	文件夹
📁 media	2018/7/20 17:11	文件夹
📁 output	2018/7/20 17:11	文件夹
📄 convert.bat	2018/7/19 15:51	Windows 批处理...	3 KB

Put target video into "media" file （please save the original video, because after converted,it will disappear in the "media" file), Encoders support mp4、avi、3gp、mov、mpg、wmv、vob、flv、etc ;

① ②

Double click the "Convert.bat" file, Popup the following window, if convert success, it will appear convert finished words,as image ②, After converted ,the video will be in the "Output" file,please copy it to TF card, then can play in display.

2. Cell Phone App Convert

Android

Scan the QR code by cell phone, download the APP then open it.

①. Open the APP, you will see the connectable devices under the WIFI list.

②. Click the device, after getting connected, the device ID will show above the WIFI List.

③. Click the connected device, you will be into the program interface.

④. Click the Upload button. will see below as Image 4, Click SELECT THE FILE button to select a video or photo from cell phone, then click Send.

⑤. While the progress bar 100% finished, the updating is successful.

①
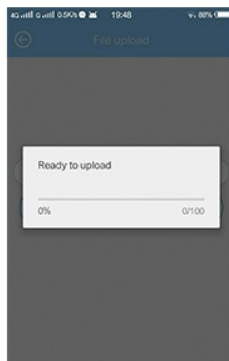

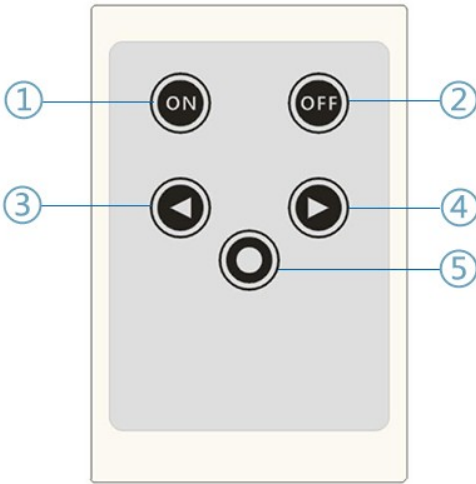

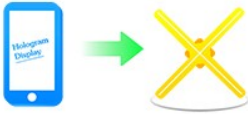

②

③

④

⑤
